

Community Of Practice

Communities of practice are formed by people who engage in a respectful process of collective learning and professional development. Join us each month for an opportunity to discuss, share and network on topics that affect your daily work in the Early Years sector.

The April topic is Child Guidance

Child guidance consists of the things that we say and do to influence a child's behaviour. Through child guidance, the goal is to help children learn constructive behaviours and to self-regulate.

As said by Erik Erikson, "the essential basis of an effective guidance system is a sound trusting relationship."

For this COP session, we will discuss the variety of strategies that we use within our programs, what is working and what is not working. We will help each other find solutions to challenges that we are facing and discuss the importance of building positive relationships with the children that we work with.

For an added challenge before the session, feel free to complete the attached "Guidance Strategies in Practice" worksheet.
